

THOMAS P. SCHNEIDER

Hello Dr. Mims,

Just wanted to send you a quick note to tell you thanks for providing an educational opportunity for our son about 5 years ago. My wife, our son Alexander and I met with you on a couple of occasions before selecting UIS to complete his degree. He had completed his general education requirements at Richland Community College and was uncertain on exactly what field to pursue. His interests were in computer security and the medical field. After listening to you about what UIS had to offer in the computer security field and your overall passion, he chose UIS. He was one of your proud first graduates with an Information Assurance Degree! After about two years of completing the application process for a government position, he gained clearance and is now working as a Vulnerability Analyst for a Department of Defense Agency.

In closing I just want to tell you "thank you" for sitting down with all of us and sharing your valuable time. You have made a difference in our lives, as well as countless others!

Sincerely,

Tom Schneider
